Bałtyk 2 & Bałtyk 3 Offshore Wind Farms (BK2 & BK3) Construction Operations

Weekly Notice of Marine Operations (WNoMO)

Work planned for the period from **06.11.2026** to **12.11.2026** for the Offshore Site Construction of **Bałtyk 2&3 Offshore Wind Farms**.

1. Objective and target group

The objective of Bałtyk 2&3 Offshore Wind Farms (OWF) Weekly Notice of Marine Operations (WNoMO) is to inform Mariners and Stakeholders about planned, ongoing and completed construction activities on the OWF areas.

Should anyone have questions regarding the operations, we kindly ask you to put them forward well in advance to Bałtyk 2&3 OWF Marine Coordination Centre (MCC).

This document is not superseding Notice to Mariners (NtM) published weekly by Hydrographic Office of Polish Navy (HOPN) but is intended to provide additional and more detailed information's about construction activities.

Mariners are requested to keep their navigational charts and publications updated with latest HOPN NtM which are accessible for download here https://bhmw.gov.pl/en/news.

This Bałtyk 2&3 OWF Weekly Notice of Marine Operations are also available for download online on the project site https://baltyk123.pl/en/about-the-project/marine-operations/

2. Project description

Equinor and Polenergia owns 50% interest each in the MFW Bałtyk 2 and MFW Bałtyk 3 offshore wind development projects located in the southwestern Baltic Sea within Polish waters. Equinor is the manager for the development, construction, and operational phases of both projects. Polenergia is responsible for obtaining all permits and management of local affairs.

The scope of the wind farm development encompasses wind turbine generators (WTGs), their foundations, inter-array cabling, one offshore substation per wind farm, an export cable system, a landfall, one common onshore substation and the connection to a transmission grid substation where the electricity shall be exported to the Polish power grid. The two projects have according to the Polish regulatory requirements a combined maximum capacity of 1440 MW, 720 MW per wind farm.

The Bałtyk 2&3 project areas of interest are in the southwestern Baltic Sea within Polish waters with water depths ranging from 20m to 45m. The total area of MFW Bałtyk II is 122 km2 and the total area of MFW Bałtyk III is 117 km2.

3. Contact details for marine coordination

Bałtyk Marine Coordination Centre (Bałtyk MCC) will coordinate wind farm traffic to/from the wind farm and the export cable corridor. MCC may provide more information if required.

4. Cooperation and coordination

At times the offshore construction activities at the site, including transit routes, will be a heavily navigated area. All vessels are to keep a sharp look out and adjust speed accordingly. Before entering the site, the Master must ensure that the bridge team is aware of the current marine activities, especially regarding safety zones.
At all times, vessels must comply with the conditions of the International Regulations for the Prevention of Collisions (COLREG).

During the construction period, in case of potential simultaneous operations, Bałtyk MCC to be contacted for further instructions.

Each Captain of respective vessel has the responsibility to communicate and cooperate with the captain or authorized representative on other vessels, rigs and/or platforms on the field to ensure safe maneuvering and work will always take place.

Mariners are advice that during the construction phase of Bałtyk 2 OWF there are also construction activities in progress on the Baltica 2 OWF and Baltic Power OWF located nearby. Information's about operations on those Offshore Wind Farms may be found at the following links:

8. Ongoing operations on Bałtyk 2 OWF

8.1. Operations in progress

Vessel **PROVIDER** is engaged in WTGIV jack-up footprint boulder clearance operations.
CTVs **MATCHER** and **NJORD ZENITH** are supporting commissioning and construction activities.
Vessel **WINDPIPER** is performing post-lay rock installation operations and survey. Vessel Bravenes performing subsea rock installation.
SOV **OLYMPIC BOREAS** is engaged in BK2 TP cleaning and inspections.
The IAC cable-laying campaign is also ongoing, with operations being carried out by vessel **SEAWAY AIMERY**, supported by the SOVs **ACTA CENTAURUS, NORWIND AUSTRI** and assisted by **PROVIDER** with rock bag installation.

Additionally vessel **ADMIRAL III** will perform bird surveys, **Fairplay-37** will relocate 2 marker buoys at landfall area (in accordance with CAFTA), vessel **EXPLORER** will move 4 marker buoys near Baltica 2 OWF and service B3 marker buoys.

Operations planned for the following week

All above-mentioned operations will continue over the next week.

8.2. Bałtyk 2 OWF construction installation progress

The maps and tables below present the coordinates of the OWF structure locations and gives an update on the progress of installation of various stages of construction. All locations are referenced to WGS 84.

8.3. Safety zones within the Bałtyk 2 OWF construction area

Safety Zone was established by the Maritime Office in Gdynia for the construction period covering the buildable area, with restrictions on entry for vessels not involved in construction works. **It was published on the Maritime Office's website on 27 April and entered into force on 12 May.**

Please see the regulation: **Zarządzenie 8**

9. Ongoing operations on Bałtyk 3 OWF

9.1. Operations in progress

BK3 – TP inspections carried out by teams onboard Olympic Boreas, Njord Zenith and Matcher.

9.2. Operations planned for the following week

BK3 – All above mentioned operations will continue in the following week.

The maps and tables below present the coordinates of the OWF structure locations and gives an update on the progress of installation of various stages of construction. All locations are referenced to WGS 84.
